According to the Bureau of Labor Statics, employment of Math majors is projected to grow 33 percent from 2016 to 2026, much faster than the average for all occupations. Employment growth will vary by occupation. Growth is expected to result from more widespread use of mathematical/statistical analysis to make informed business, healthcare, and policy decisions. In addition, the large increase in available data from the Internet will open up new areas for analysis.

Employment of mathematicians is projected to grow 30 percent from 2016 to 2026, much faster than the average for all occupations. The amount of digitally stored data will increase over the next decade as more people and companies conduct business online and use social media, smartphones, and other mobile devices. As a result, businesses will increasingly need mathematicians to analyze the large amount of information and data collected. Analyses will help companies improve their business processes, design and develop new products, and even advertise products to potential customers.

In addition, mathematicians and statisticians will be needed in the scientific research and development services and pharmaceutical and medicine manufacturing industries. The aging of the U.S. population is expected to prompt pharmaceutical companies to develop new treatments and medical technologies. Biostatisticians will be needed to conduct the research and clinical trials necessary for companies to obtain approval for their products from the Food and Drug Administration.

WHAT YOU CAN DO NOW

Join a professional society or association related to Mathematics – See list below

Consider studying abroad. [Click here](#) to learn more.

Volunteer for WCSU’s Vita Program

Volunteer for [Junior Achievement](#) in your community

ASSOCIATIONS

Associations are a great way for college students, recent graduates, and career changers to enhance personal and professional development, opportunities to build credibility and many networking avenues, which cannot be found anywhere else. Associations also offer drastically reduced membership rates for current students so NOW is the time to join.

American Mathematical Society (AMS)

American Society for Engineering Education (ASEE)

American Statistics Association (ASA)

Association for Women in Mathematics (AWM)

Casualty Actuarial Society

Mathematical Association of America (MAA)

National Council of Teachers of Mathematics (NCTM)

Society of Actuaries

Society for Industrial and Applied Mathematics (SIAM)

Society of Women Engineers (SWE)
