# Flanders Nature Center and Land Trust Tree Inventory Fellowship

---

Flanders seeks a University partner in an upper-level undergraduate or graduate student to complete a baseline study of what tree species are present now and a measure of their relative health. From this baseline study, we would also expect recommendations for changes to our management plans and a presentation to be included in the Flanders program plan for Winter 2023.

The ideal candidate for this position would be an upper-level college or Masters Student in Environmental Studies, Forestry, Plant Ecology or similar course of study.

The successful candidate will be supported by an up to \$3,000 stipend and supervised by one or more members of the Land Management Committee.

Interested students should contact the PI at [pinout@wcsu.edu](mailto:pinout@wcsu.edu) and include a cover letter describing your research experience and interests, as well as a CV by May 15th.
