## HEALTH EDUCATION PROFILE

According to the Bureau of Labor Statics, Health Educators provide and manage health education programs that help individuals, families, and their communities maximize and maintain healthy lifestyles. They collect and analyze data to identify community needs prior to planning, implementing, monitoring, and evaluating programs designed to encourage healthy lifestyles, policies, and environments. They may also serve as a resource to assist individuals, other health professionals, or the community, and may administer fiscal resources for health education programs.
