MEDIA ARTS PROFILE

According to the Bureau of Labor Statics, overall employment of multimedia artists and animators is projected to grow 8 percent from 2016 to 2026, about as fast as the average for all occupations. Projected growth will be due to increased demand for animation and visual effects in video games, movies, and television.

Consumers will continue to demand more realistic video games, movie and television special effects, and three-dimensional movies. This will create demand for newer computer hardware, which will enhance the complexity of animation and visual effects. Additional multimedia artists and animators will be required to meet this increased demand. Further, an increased demand for computer graphics for mobile devices, such as smart phones, will lead to more job opportunities. Multimedia artists will be needed to create animation for games and applications for mobile devices.

ASSOCIATIONS

Professional associations are a great way for college students, recent graduates, and career changers to enhance personal and professional development while being provided endless networking opportunities. Being a member of an association also offers chances to attend conferences, learn about latest industry trends, scholarships, internship opportunities, along with attitudes and competencies expected in the industries of interest. Many associations encourage students to participate and even offer drastically reduced membership rates. Being a member of an association could be the best thing you do for your career.
