

WESTERN CONNECTICUT STATE UNIVERSITY
ANALYSIS OF 2018 CAEP EIGHT ANNUAL REPORTING MEASURES

Measure of Completer Impact	Analysis of Trends	Comparisons with Benchmarks	Source
I. Impact on P-12 Learning and Development			
2016-2017 edTPA (Scale 2013)	Analysis indicates that the majority of program completers had a positive impact on P-12 learning and development. The majority of program completers scored at the national benchmark or slightly above it with the exception of the Secondary Education Spanish completers. There were no 2017 Health Education program completers.	The national edTPA norming data provided the benchmarks for this measure.	edTPA (Scale, 2013)
II. Indicators of Teaching Effectiveness			
Spring 2017 Student Teaching Evaluation Instrument (STEI)	Analysis indicates that the Elementary Education and Secondary Education English program completers scored above the EPP mean on the STEI. The Secondary Education Math, History, and Spanish program completers were slightly below the	The EPP mean of 3.01 was used as the benchmark for the STEI.	Student Teaching Evaluation Instrument (STEI)* *The CSDE SEED Teacher Evaluation instrument.

	mean indicating areas for improvement. There were no 2017 Health Education program completers.		
III. Satisfaction of Employers and Employment Milestones			
CAEP WCSU Employers Survey (2017 Completers)	The response rate for the survey was low with only 3.5%, which is below the required CAEP benchmark. Those who did respond evaluated completers highly with all categories rated at the proficient level. The EPP is conducting case studies in spring 2018 to supplement this data.	The benchmark for the survey was CAEP 20% required response rate.	CAEP WCSU Employer Survey
IV. Satisfaction of Completers			
CAEP WCSU Alumni Survey (2017 Completers)	The response rate for the survey was high at 48%. The highest indicators regarding preparation were; integrating professional standards, demonstrating professional/ethical behavior, and engaging in reflection. Lowest rated indicators focused on differentiating instruction and classroom management.	The benchmark for the survey was CAEP 20% required response rate.	CAEP WCSU Alumni Survey
V. Graduation Rates			
WCSU IR Graduation Rate Report	WCSU Institutional Research determined the graduation rate from acceptance to	The EPP has not established a benchmark yet for this measure.	WCSU IR Graduation Rate Report

	the professional development semester to completion. Evidence indicates that the majority of candidates are completing the program once they are accepted to the professional semester.		
VI. Ability of Completers to Meet Licensing Requirements			
WCSU Alumni Survey	Alumni were asked to report their place of employment in the survey response. However since not all included this information, the EPP used the CSDE certification database portal to confirm licensure. The majority of Elementary Education candidates were certified and eligible for employment. All secondary education program completers were certified. There were no 2017 Health Education program completers.	The EPP has not yet established a benchmark for this measure.	WCSU Alumni Survey CT Educator Certification System
VII. Ability of Completers to be Hired in Positions for which they were Prepared			
WCSU Alumni Survey	Alumni were asked to report their place of employment in the survey response. However since not all included this information, the EPP used the CSDE certification database	The EPP has not yet established a benchmark for this measure.	

	<p>portal to confirm employment. Follow up phone calls were also utilized.</p> <p>According to the CSDE certification portal, 31% of Elementary Education completers are working in public schools. Two completers are traveling abroad.</p> <p>Since the majority of respondents did not call back about employment, it is difficult to discern if they are working in private or parochial schools. The majority of secondary education completers are working in public school districts. The EPP has created an induction plan for 2018 completers to improve the response in regard to employment. There were no 2017 health education completers.</p>
