

# Master of Science in Addiction Studies

## PROGRAM OVERVIEW

The M.S. in Addiction Studies is a 37-credit graduate degree program for those who wish to specialize in substance-use disorder (SUD) treatment, education, research, and prevention.

- Full-time students are on a one-year track
- Part-time students on a two-year track
- Evening, Saturdays, in person and online courses
- Six-month internship (10-20 hours/week) at residential, outpatient, and community outreach programs.

## MISSION STATEMENT

Our core objectives are to:

- Provide the highest quality training in evidence-based interventions
- Increase the number and diversity of professionals in the addiction prevention and therapy field
- Provide community-based outreach education in prevention treatment of problems associated with alcohol, opioids, cannabis, tobacco and other drugs
- Prepare our graduates to obtain Connecticut licensure as alcohol and drug counselors (LADC).
