**A Greek Celebration:**
Oct. 22*

**Macricostas Speaker:**
Reginald Dwayne Betts
Oct. 24*

**World Origami Days Kickoff**
Oct. 24

*RSVP by Oct. 17
## Faculty & Student Spotlight

Biology Major Jason Linn had the opportunity to apply his biology knowledge and skills as a field assistant, accompanying Dr. Thomas Philbrick to Rondonia, Brazil, working along the Madeira River and tributaries. The trip was part of a National Science Foundation supported research project focused on the ecology of neotropical riverweeds. The project is overseen by Dr. Philbrick (WCSU) and Brad Ruhfel (Univ. of Michigan), in collaboration with Dr. Claudia Bove (Federal University of Rio de Janeiro). Want to learn more about the project? You can often find Jason hanging around Dr. Philbrick's office and lab, Science Building 146, where he pokes around historical riverweed specimens.

---

## Previously in MSAS

State Senator, Julie Kushner, visited WCSU on September 17th for Constitution Day. She participated in a filmed segment with Election Connection, visited a political science class, had lunch with students & campus officials, and gave a keynote lecture in the evening. A special thanks to Julie Kushner for visiting and all who participated.
